Discord Kudocoin currency

Discord Kudocoin 经济货币系统

The Discord Kudocoin currency system is one of our most exciting projects. This currency system will be an integral part of the Seer Program moving forward, and will be the fuel that powers the implementation of our Futarchy-based decision markets that will cover various topics throughout the Program.

> Discord Kudocoin 经济货币系统是最让我们激动人心的项目之一。该系统将是整个 Seer 大使项目的一个重要组成部分，并将成为推动基于 Futarchy 预测市场的助燃剂，在整个项目中，这些预测市场将覆盖各种各样的主题。

Initially Kudocoins will only be distributed to select program participants: Tier 3 titled Seers and Zeitgeist team members. Holders of the Kudocoin currency are encouraged to distribute the currency to the rest of the program by "tipping" members who exhibit good behaviours. Good behaviours are anything that helps grow the program and evolve towards our goals and vision. This could be as simple as answering questions for new arrivals in the discord, or as technical as submitting work that furthers the development of the Zeitgeist ecosystem itself.

> 在计划之初，只有被特定选中的项目参与者以及头衔等级为 3 级以上的大使才可获得。该计划将鼓励 Kudocoin 货币的持有者通过给表现良好的成员"小费"的形式，以此将该货币分配给该计划的其他成员。良好的行为有助于项目的发展，使其朝着我们的目标和愿景发展。例如可以在discord中简单地为新人解答问题，亦或为促进 Zeitgeist 生态系统的发展提交贡献等行为。

There will be other participation-based ways for Seers to acquire Kudocoins along with a faucet system in the future that allows members to claim a daily allowance. The ultimate goal is to put decision making power into the hands of the Seer Program community by allowing them to buy "decision tokens" with this currency and trade those into our Futarchy-based decision markets that will be hosted within the Seer Program Discord.

> 未来，先知们还可以通过其他的参与方式获得 Kudocoins，以及通过水龙头来领取每日津贴。该计划的最终目标是将决策权交到先知计划社区手中，通过允许他们用 Kudocoins 购买"预测代币"，并将其交易到基于 Futarchy 的预测市场，预测市场将托管在 Seer Program Discord 中。

The Kudocoins Currency System will function as an open source project, with a base code hosted at the Seer Program Github. Participants will need to contribute to this base code, and submit pull requests to the Crystal Ball Github with contributions they've added.

> Kudocoins 经济货币系统将作为一个开源项目，其全部源码托管在 Crystal-Ball-ZG 上， 开发者可以通过向 Crystal Ball Github 提交他们的 pull 请求来对其做出贡献。

Unfortunately testing will not be allowed in the main Seer Program Discord as that would create a massive security concern. For testing of your code, you can either create a new Discord or use a personal Discord and then create an application for it, attach a bot to the app, and use the bot token to authorize actions taken on your new/personal Discord.

> 不幸的是，在 Seer Program Discord 中不允许进行测试，因为这会造成巨大的安全问题。为了测试您的代码，您可以创建一个新的 Discord 或者使用个人的 Discord，然后为其创建应用程序，并且添加机器人到应用程序，使用机器人令牌来授权您对新的 Discord 或者个人的 Discord的操作。

Requirements

- Knowledge of Python
- Github account

> 您需要会/有
>
> - 熟悉 Python
> - Github 账号

Kudocoin necessary functions

- Ability to "tip"
- Ability to buy decision tokens from the Seer Program Discord shop
- Ability to sell decision tokens to a Decision Market. (This would populate a second json file)
- Ability to track user inventories and balances
- Discord faucet function that allows for a daily claimable balance per user

> Kudocoin 经济货币系统的必要功能
> 具有"小费"的功能
> 具有能够从 Seer Program Discord 商店购买预测代币的功能
> 具有在预测市场出售预测代币的功能(这将完成第二个 json 文件)
> 具有能够跟踪用户抵押和余额的功能
> 具有 Discord 水龙头功能，允许每位用户每日领取津贴
